

# Oracle Business Intelligence Enterprise Edition

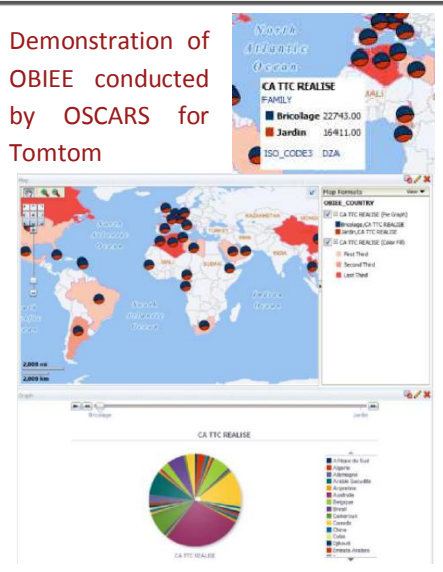

## Description of the project

Decision-making IT (or Business Intelligence - BI) includes all means, tools and methods to **represent and model the activities of a company to help decision-making**. Adding the mapping component to BI is usually requested order to visualise the activities of the company more easily. Oracle Business Intelligence Enterprise Edition (OBIEE) is a suite developed by Oracle offering a **full range of analysis and reporting**. OSCARS can help you **integrate the mapping component into your company's decision-making process via OBIEE**. OSCARS can also accompany you in a **Data Mining** project via SQL.

## Illustrations

Demonstration of OBIEE conducted by OSCARS for Tomtom

## Technologies and prerequisites

- Oracle Business Intelligence Enterprise Edition
- Company data
- Spatial and attribute data

## References

POC for Paris Airports  
Tomtom

## Kit for implementation of the project

- OSCARS custom training (1 to 3 days)
- Addition of the mapping component to your BI via OBIEE (3 to 10 days)
- Data Mining (1 to 5 days)

The number of days indicated is for guidance. Each project is different and may require a variable number of days. An estimate is required before the beginning of each project. In addition, this kit enables implementation of the project so that the customer can subsequently carry out the project autonomously. It is not an A to Z assessment of the project.
