GIP powered by OSCARS

# AIRPORT OPERATIONS CENTER (APOC)

BY OSCARS S.A.

## OUR EXPERIENCE

OSCARS S.A. has been working with Liège Airport for 3 years.. Since GIP4Airport implementation, the traffic has increased by 12%, but more importantly the cargo volume increase by more than 30%. Our platform integrates all airport partners to visualize and improve the aircraft movement process, including emergency services, refueling, and maintenance.

## OUR SOLUTION

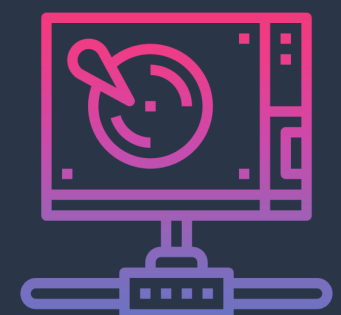

Software as a Service

Resource, cost & flow analysis

Real-time planning management

Back-office integration & customized dashboard

### HYPERVERSION DASHBOARD

**Integrate complex data flow in real-time**

Security, Mission, Planification, Performances, Baggage

**Support your decision-making**

Operational, Tactical & Strategic

**Share meaningful insights to your airport units & partners**

Real-time alerts & periodic reports to improve performances on the long run.

### PERSONALIZED KPI'S

**Real-time insights**

- Updated inbound & outbound flights
- Stands planification
- Security checks
- Baggage flow
- Passenger flow
- ...

**Airport statistics:**

- On-time performances & delays
- GSE & stands use & lifecycle planning
- Refueling statistics
- ...
