

Cartoon – Mapping applications

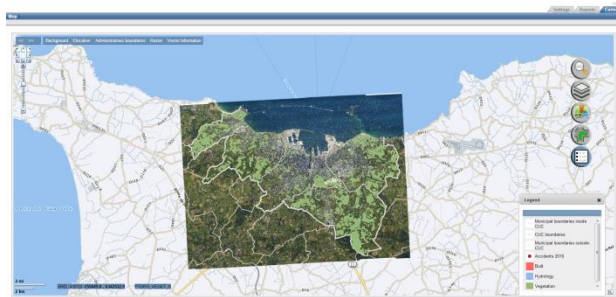

Description of the project

Cartoon is a **Geographic Information System (GIS) application server** developed by OSCARS for **creating and deploying mapping applications on the web**. In addition, Cartoon **supplies services** such as WMS, WFS, WFS-T, CSW, geocoding, routing and network. It embeds a spatial database to store and integrate advanced processes, as well as a Middle Tier application server including a mapping restitution tool, a development interface for web components to generate custom data formulae and the GIS web application.

For more detailed information on Cartoon, please read the corresponding descriptive factsheet.

Exemple of the Cartoon interface

Technologies and prerequisites

- Cartoon is based on Oracle technologies:
 - Oracle database
 - Oracle MapViewer (mapping server)
 - Oracle Application Express (development interface for web components)
- Cartoon web application
- Spatial and attribute data
- 3 possible licenses:
 - Oz4rs enterprise – Cartoon
 - Oz4rs Lite – Cartoon
 - A la carte project based on customers' licenses

Kit for implementation of the project

- Development of a mapping application (depending on needs)
- Installation of the mapping application (1 to 2 days)
- Training on use of the mapping application (1 to 2 days)

The number of days indicated is for guidance. Each project is different and may require a variable number of days. An estimate is required before the beginning of each project.
