

# Audit

## Description of the project

Various types of audits can be conducted according to a customer's needs. The audits conducted by OSCARS will enable, for example, to **improve the management and the use of the Oracle system in your Geographic Information System (GIS)**. Furthermore, OSCARS can also audit to help you **improve performance**, implement a **database system which is interoperable** with various editors on the market (Esri, Autodesk, Star-Apic etc), or respond to any other request for advice connected with Oracle Spatial.

### Illustration

### Technologies and prerequisites

- Oracle products
- Customer's GIS technologies

### Kit for implementation of the project

- Training : Advanced course on Oracle Spatial for DBAs (2 days) or Advanced course on Oracle Spatial for developers (2 to 3 days)
- General audit of the Oracle system in your GIS (3 to 5 days)
- Audit/advice to enhance the performances of Oracle (1 to 5 days)
- Audit/advice for any questions concerning Oracle Spatial (depending on needs)
- Audit in order to implement an interoperable system (depending on needs)
- Follow-up and improvement of processes, and interaction between GIS and other tools (depending on needs)

The number of days indicated is for guidance. Each project is different and may require a variable number of days. An estimate is required before the beginning of each project.
